Address: Assin Foso, Ghana | **phone:** +233 59 834 6928 | **email:** edwin.kofi.nyarkoh@gmail.com | **LinkedIn:** [linkedin.com/in/edwin-nyarkoh](https://www.linkedin.com/in/edwin-nyarkoh) | **GitHub:** github.com/Edwin-Kofi-Nyarkoh | **Portfolio:** [My portfolio URL](#)

PROFESSIONAL SUMMARY

Level 300 Information Technology student at the University of Cape Coast with hands-on full-stack development experience and an AWS Certified Cloud Practitioner credential. Passionate about securing cloud infrastructure and building a career as a Cloud Security Engineer. Brings practical knowledge of IAM, VPC, S3, and cloud-native security principles, complemented by Linux/Kali Linux proficiency and network reconnaissance skills. Eager to apply both Cybersecurity mindsets to protect real-world cloud environments during the Amalitech internship.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)	<i>Amalitech Jan_26</i>	2026
Google Cybersecurity	Coursera	In Progress
AWS Solutions Architect – Associate (SAA-C03)	<i>Amazon Web Services</i>	Planned

TECHNICAL SKILLS

Cloud & Security	AWS (IAM, VPC, EC2, S3, CloudTrail) · Cloud Security Fundamentals · IAM Least Privilege · Security Group Hardening
Security Tooling	Kali Linux · Nmap (Port Scanning, NSE) · Privilege Escalation · Network Reconnaissance · Prowler (Cloud Auditing)
Web Security	OWASP Top 10 · JWT Authentication · SQL Injection / XSS Prevention · bcrypt Password Hashing · Input Validation
Full-Stack Dev	JavaScript · TypeScript · React · React Native · Next.js 15 · Node.js · Python
Databases & ORM	PostgreSQL · Prisma ORM · REST APIs · TanStack Query v5
DevOps & Tools	Docker · Git & GitHub · Bash Scripting · Linux CLI · Agile / Git Workflow
Platforms	AWS Free Tier Labs · HackTheBox · Linux CLI (Ubuntu / Kali)

PROJECTS & EXPERIENCE

Ticketing Management System | [QRGate – Live Demo](#)

July 2025

- Engineered a scalable PostgreSQL + Prisma ORM relational schema with data integrity constraints and optimized query patterns.
- Implemented secure session handling and input validation to mitigate common injection attacks.
- Collaborated in a team of 3 using Git and an Agile workflow; incorporated UI/UX feedback from 10+ peer testers.

Campus Service Marketplace | [TaskLink Africa – Live Demo](#)

September 2024

- Architected a responsive Next.js web platform connecting students with local service providers; focused on clean, accessible UI.
- Gathered and incorporated feedback from 10+ peers, iterating rapidly on UI/UX improvements.
- Deployed on Vercel with environment-variable separation for secure API key management.

Secure Multi-Tier AWS Cloud Infrastructure | [GitHub - Repo](#)

June 2026

- Designed and deployed a multi-tier AWS architecture with public and private subnets inside a custom VPC, isolating application and data layers using security groups and network ACLs.
- Launched EC2 instances across public and private subnets, restricting SSH access via a bastion host and enforcing least-privilege IAM roles on all instances.
- Configured an S3 bucket for application asset storage with server-side encryption (SSE-S3), public access blocked, and a resource-based bucket policy limiting access to the EC2 IAM role only.
- Enabled AWS CloudTrail across all regions to log API calls and detect unauthorized access attempts, storing audit logs in a separate locked S3 bucket.

AWS Cloud Security Audit — Prowler | [GitHub Repo](#)

- Audited a live AWS account using Prowler on Kali Linux, scanning IAM, S3, CloudTrail, and VPC for security misconfigurations.
- Identified a Critical S3 public access exposure, absent CloudTrail logging across 16 regions, and missing MFA on IAM users.
- Documented all findings with plain-English risk explanations and recommended fixes in a written security report.

SECURITY LABS & SELF-DIRECTED LEARNING

Actively working through a structured cybersecurity curriculum in preparation for cloud security work:

- Linux Basics for Hackers
- Privilege escalation techniques, wireless hacking fundamentals, and Bash/Python security scripting on Kali Linux.
- Network reconnaissance with Nmap: host discovery, OS detection, port scanning, and Nmap Scripting Engine (NSE).
- OWASP Top 10 labs on HackTheBox: Broken Access Control, Injection, SSRF, and Insecure Direct Object References.
- Cloud security auditing with Prowler / Scout Suite against AWS Free Tier: identifying open S3 buckets and overly permissive IAM policies.
- Python scripting for security tool development (port scanners, log parsers).

EDUCATION

B.Sc. Information Technology | *University of Cape Coast* | Cape Coast, Ghana Jan 2024 – Present

WASSCE – Business | *Apam Senior High School* | Apam, Ghana September 2022

LEADERSHIP & EXTRACURRICULAR

- Amalitech Coding Club Lead – Designed and delivered a multi-session JavaScript curriculum for beginner programmers at UCC.
- Treasurer – New Apostolic Church UCC Campus Congregation (2025/2026, present)
- Assistant Treasurer – New Apostolic Church UCC Campus Congregation (2024/2025)

LANGUAGES & PERSONAL SKILLS

Languages: English (Fluent) · Twi (Fluent)

Personal: Strong communicator · Team player · Works well under pressure · Detail-oriented · Self-directed learner
